# About Us

- SIBIC Business Incubator : The Private Incubator working in the field of providing services in order to develop StartUps and Business that will eventually create an impact over the Society.
- Being the First Private Incubator in South Maharashtra, SIBIC is focusing on tier 2 & tier 3 Cities and the Students from these cities and towns will help in creating and producing the Innovative StartUps that will help in solving long-lying problems of the society. Their Unique Ideas for the Problems will help in solving the current needs that are bequeathing the region.
- Our Strong, Experienced, Innovative Leaders, Excellent Mentor & Advisory Board is thus available to create the inspiring impact for the Business & StartUps of the Region and thus supplement it to the new level.
- SIBIC is an Incubator which provides a single point platform for early stage start-ups by combining the power of innovation with entrepreneurship in order to impact the community in Employment generation, Skilling and Education. SIBIC aims to provide support to high-potential innovations throughout their journey.
- While having a flexible approach that suits the needs of start-ups in various themes and local contexts, we have clustered the support to start-ups and stakeholders to grow and scale their business model from Ideation to commercialization.

In the incubation phase, we work with interested individuals or groups and inspire formation of new ideas and potential solutions to a given issue. We then help them build it into a "Minimum Viable Product," let them test it with potential customers and incorporate their brand new start-up. So, you can say that we are in the race to strengthen the Entrepreneurial Eco-system for all in tier-2 & tier-3 cities of India.
